SUDIPTA JANA

OBJECTIVE

As an innovative full-stack developer, I specialize in creating fresh, modern designs using technologies such as Javascript ,Html ,Css,React, Node.js, and MongoDB. I have a track record of successfully collaborating with technical teams to deliver attractive and engaging results that meet clients' needs. I am constantly seeking to expand my knowledge and skillset by learning new technologies, and have a passion for creating problem-solving products that provide tangible value to users.

EXPERIENCE

Senco Gold & Diamonds

March 2022 - January 2023

Sales executive

SHARPENER TECH

Present -

Full-Stack-Developer (Trainee)

- As a Full-Stack Developer trainee, I developed backend applications using Node.js, Express, and MongoDB.
- I collaborated effectively with team members, taking ownership of tasks and consistently delivering projects on time.
- Through my experience, I gained competency in MongoDB queries, CRUD operations, and Mongoose.
- Additionally, I have understanding of REST APIs with different HTTP methods, including GET, POST, PUT, and DELETE.
- During my training, I faced several challenges, but I overcame them by seeking guidance from mentors and applying my knowledge in a practical setting.

EDUCATION

University of Calcutta

2020

Bachelor of Commerce (Honours)
Completed coursework with a 57% overall grade, demonstrating a commitment to academic excellence.

PROJECTS

Parallax website

Designed and developed a website using the parallax scrolling trend, where the foreground and background content moves at different speeds while scrolling.

Bloggin website backend

Developed a full-fledged blogging website with user authentication and authorization. The website includes multiple APIs for author registration, login, and CRUD operations on blog resources.

SKILLS

Javascript

Node.js

Express

GitHub/Git

MongoDB

React

HTML

CSS

Bootstrap

LANGUAGES

English

Hindi

Bengali

URL Shortner
Created a URL shortening service, similar to Bitly, to help users easily share long URLs.

Shopping Cart
Built the back-end of an e-commerce website with multiple APIs for users, products, cart, and orders.

Todo List
Developed a Todo-list using React for adding and managing notes.

Overall, these projects demonstrate my skills in web development and API design, as well as my proficiency in various programming languages and frameworks.

HOBBIES

I enjoy pursuing a range of hobbies, but two that particularly stand out to me are gardening and photography.
